) The command system is also known as:	:	1)
A) market socialism.	B) socialism or communism.	
C) pure capitalism.	D) the market system.	
2) The economy of the former Soviet Unio	on was best described as:	2)
A) mixed capitalism.	B) a command economy.	
C) authoritarian capitalism.	D) market socialism.	
3) The economy of North Korea most clos	sely approximates:	3)
A) authoritarian capitalism	B) market socialism	
C) pure capitalism	D) a command economy	
4) Today, China's economy most closely a	approximates:	4)
A) authoritarian capitalism	B) pure capitalism	
C) market socialism	D) a command economy	
5) Which would not be characteristic of a	capitalist economy?	5)
A) free enterprise and choice		
B) government ownership of the mean	ns of production	
C) reliance on the market system		
D) competition and unrestricted mark	ets	
b) Which of the following statements best	-	6)
A) In a mixed economy, society deter services only through the market s	rmines production and the allocation of goods and vstem.	
• •	dividual self-interest is relatively unimportant	
because government makes most of	• • •	
	policies determine the production and the	
allocation of goods and services, b	out each individual is free to pursue his or her own	
self-interest.		
D) In a mixed economy, the government production and allocation of goods	ent and private sectors interact in determining s and services.	
7) The private ownership of property resor	urces and use of prices to direct and coordinate	7)
economic activity is characteristic of:		
A) a market system.	B) socialism.	
C) communism.	D) a command system.	
3) In a capitalistic economy:		8)
A) there is a reliance on the market sy	ystem.	
B) markets can never be competitive.		
C) the government owns the means of		
D) consumers can never be sovereign		
9) The term "laissez faire" suggests that:		9)
A) government should not interfere w		
B) government action is necessary if t	the economy is to achieve full employment and	

Exam

C) land and other natural resources should be privately owned.	ould be publicly owned, but capital equipment	
1 .	ould be privately owned, but capital should be	
10) The term "mixed economy" refers to an	economy:	10)
A) which engages in both domestic an		,
	e markets and government involvement in the	
economy.	6	
C) comprised of both product and reso	ource markets.	
D) which functions primarily on the ba		
11) The Canadian economy most closely ap	proximates:	11)
A) market socialism	B) a command economy	
C) mixed capitalism	D) authoritarian capitalism	
12) Which of the following is unique to a m	arket economy system?	12)
A) the extensive use of capital goods		
B) private ownership of property resor	urces	
C) the use of money		
D) specialization		
13) Property rights are important because th	ney:	13)
A) encourage investment and growth.		
B) facilitate exchange.		
C) are conducive to the writing of boo	oks and music.	
D) do all of the above.		
14) The market system is an economic syste	em that:	14)
A) produces more consumer goods that	an capital goods.	
B) gives private individuals and institution.	utions the right to own resources used in	
C) gives the government the right to ta	ax individuals and corporations for the	
production of capital goods.		
D) produces more capital goods than o	consumer goods.	
15) The market system is characterized by:		15)
A) government control of all production	on decisions.	
B) extensive government constraints of	on individual behaviour.	
C) government rationing of all goods a	and services.	
D) private ownership of the means of	production.	
16) In a market system, well-defined proper		16)
A) limit destructive economic growth.	· · · · · · · · · · · · · · · · · · ·	
C) create economic problems.	D) increase unnecessary investment.	
17) Which is a major feature of the market s	•	17)
A) central planning by government to		
B) price floors and price ceilings in all		
C) reallocation of all resources from p	private to public uses	

production.

full

D) the right to own private property and control resource use	
 18) Which is a major feature of pure capitalism? A) reallocation of resources from private to public uses B) central planning by government to provide goods and services C) price floors and price ceilings in markets D) the right to own private property and control resource use 	18)
 19) By free enterprise, we mean that: A) individual producers determine how to produce, but government agencies determine what will be produced. B) products are provided free to those who can't afford to buy them. C) individuals may obtain resources, organize production, and sell the resulting output in any legal way they choose. D) individuals are free to produce those products that government agencies determine can be produced profitably. 	19)
 20) Which statement is correct? A) Freedom of choice and enterprise are essential elements of the market system. B) The market system is efficient at allocation of resources, but not consumer goods to their most valued uses. C) Producers are "kings" in a market economy because they determine what is produced. D) The operation of a market system eventually results in an equal distribution of income. 	20)
21) Which is characteristic of the capitalistic ideology? A) government ownership of the means of production B) unselfish individuals C) centralized decision-making D) free enterprise and choice	21)
 22) How do workers typically express self-interest? A) by seeking jobs with the best combination of wages and benefits B) by seeking the highest price when purchasing a consumer product C) by minimizing the economic losses of other business firms D) by maximizing the economic profits of other business firms 	22)
23) Consumers express self-interest when they: A) seek the lowest price for the product. C) collect economic profits. B) reduce business losses. D) search for jobs with the highest wage	23)
 24) Competition means that: A) there are large numbers of independently acting buyers and sellers in each market. B) there is only one seller in a market. C) sellers can cause artificial product scarcities and thereby manipulate market price. D) a given product can be purchased at a number of different prices. 	
25) The competitive market system:A) discourages innovation because firms want to get all the profits possible from existing machinery and equipment.	25)

B) discourages innovation because it is difficult to acquire additional capital in the form of new machinery and equipment.C) encourages innovation because successful innovators are rewarded with economic profits.D) encourages innovation because government provides tax breaks and subsidies to	
those who develop new products or new productive techniques.	
 26) Competition is more likely to exist when: A) products are produced by a few large firms. B) the government purchases most goods and services. C) there is a single supplier of all goods and services. D) there is free entry into and exit out of industries. 	26)
 27) Which condition will encourage competition? A) government licensing requirements in order to enter an industry B) the freedom of sellers and buyers to enter or exit an industry C) a small number of buyers and sellers in a market D) the government serving as the only supplier of goods to consumers 	27)
 28) A purely competitive economy assumes the existence in each industry of a: A) large number of small firms facing a few large buyers. B) few large firms facing a large number of small buyers. C) large number of small firms facing a large number of small buyers. D) few small firms facing a few small buyers. 	28)
 29) Competition denotes a condition where: A) there are many independent buyers and sellers in a market. B) there is only one seller in a market. C) a given product can be purchased at a range of prices. D) a few sellers attempt to garner a larger share of the market by cutting prices. 	29)
 30) If competitive industry Y is incurring substantial losses, we can expect that output will: A) expand, product price will fall, and losses will tend to disappear. B) expand, product price will rise, and losses will tend to disappear. C) contract, product price will fall, and losses will increase. D) contract, product price will rise, and losses will tend to disappear. 	30)
31) Suppose industry A is realizing substantial economic profits. Which of the following best describes the adjustment process which would bring about a new equilibrium? A) Firms will leave the industry, output will rise, and product price will fall. B) Firms will enter the industry, output will rise, and product price will fall. C) Firms will leave the industry, output will fall, and product price will rise. D) Firms will enter the industry, output will rise, and product price will rise.	31)
32) Which statement is correct?A) Prices affect the distribution of goods in a market system but not the allocation of resources.B) In a market system, buyers and sellers must be in face-to-face contact with each other.C) The operation of a market system has little, if any, effect on the distribution of income in the economy.	32)

D) In a market system, prices serve to ration goods and services to consumers.		
33) A characteristic of the market system is:		33)
A) extensive use of barter.	B) extensive use of capital goods.	
C) low interest rates.	D) extensive use of price controls.	
34) The development of new technology and capit market system. This is because:	tal goods are essential elements for the	34)
A) the most direct methods of production are	e more efficient.	
B) the standard of living and development o		
C) more capital goods means less future con		
D) using more efficient production processe	1 0	
,		
35) The basic reason for the production of capital	goods is to:	35)
A) enhance future productive efficiency.		/
B) promote the concentration of economic p	ower in the business sector.	
C) better synchronize the operation of resou		
D) facilitate exchange where a coincidence of	<u>-</u>	
,		
36) The process in which workers select specialize	ed tasks to make a product is referred to as:	36)
A) freedom of choice.	B) division of labour.	
C) a coincidence of wants.	D) roundabout production.	
	•	
37) The division of labour means that:		37)
A) labour markets are geographically segme	nted.	
B) unskilled workers outnumber skilled wor	kers.	
C) each worker performs a large number of	tasks.	
D) workers specialize in various production	tasks.	
38) Specialization and trade are beneficial to socie	ety because:	38)
A) a division of labour lowers prices for pro		
B) scarce resources are utilized more efficie	•	
C) the output of economic goods may be inc	creased with no increase in resources.	
D) all of the above are correct.		
39) Specialization in production is important prim	•	39)
A) allows society to have fewer capital good	ls.	
B) results in greater total output.		
C) allows society to avoid the coincidence-o	of-wants problem.	
D) allows society to trade by barter.		
(0) The division of labour and areas and divitive	and officiancy by	40)
40) The division of labour enhances productivity a	• •	40)
A) allowing workers to develop skills by wo	orking on one, or a nimited number, of	
tasks.	inting differences in the inchilities and	
B) allowing workers to take advantage of ex	isting differences in their admittes and	
skills.	a from one production tools to enother	
C) avoiding the time loss involved in shiftin	g from one production task to another.	
D) all of the above means.		
41) Specialization in production is economically b	peneficial primarily because its	41)
A) guarantees full employment.	chemetal primarity because it.	±1)
, 5 mm mile 25 1 mil 10 j mone.		

B) facilitates trade by bartering.C) permits the production of a largerD) allows everyone to have a job wh	output with fixed amounts of resources. ich they like.	
42) The use of money for exchange: A) encourages more specialization in	n production.	42)
B) increases the use of barter.	-	
C) reduces consumer sovereignty.D) decreases the coincidence of want	ts.	
43) Which is the main problem with the ba	arter system of exchange? Barter:	43)
A) requires a coincidence of wants.B) fosters specialization and division	of labour	
C) encourages self-interest and selfis		
D) undermines the right to bequeath.		
, 1	sed by the lack of double coincidence of wants.	44)
A) Barter	B) Freedom of choice	
C) Trade	D) Money	
•	have pens and you want pencils. To achieve your	45)
objective there must be a(n): A) coincidence of wants.	B) entry and exit from the market.	
C) large number of sellers.	D) use of capital goods.	
46) On the basis of the information provide	ed it can be said that:	46)
A) no coincidence of wants exists be		
B) a coincidence of wants exists between		
C) a coincidence of wants exists between		
D) a coincidence of wants exists between	ween British Columbia and Alberta.	
_	ed and assuming trade occurs between the three	47)
provinces we can expect:	British Columbia and receive money in return.	
	British Columbia and receive autos in return.	
C) Alberta to exchange apples with (
D) none of the above to occur.	•	
48) Given the information provided and as	suming trade does occur between the provinces,	48)
we can expect:		
A) that money will not be needed to		
specializing in the production of a	British Columbia can obtain lettuce while	
	ritish Columbia to Alberta to Ontario.	
· · · · · · · · · · · · · · · · · · ·	from British Columbia to Ontario to Alberta.	
49) Which is assumed to be most limited in	n scope under a market system?	49)
A) competition	B) freedom of enterprise	,
C) freedom of choice	D) government	
50) Which of the following is not a part of	a market system?	50)

A) private propertyB) freedom of enterprise and choiceC) government determination of basic economD) competition in product and resource market		
51) The most important consequence of property rig	ghts is that	51)
A) allow for freedom of choice.		,
B) they facilitate exchange.		
C) they allow for a division of labour.		
D) they encourage people to cooperate by help	ping to ensure that only mutually	
agreeable economic transactions take place	e.	
52) Which is not one of the Five Fundamental Ques		52)
A) What goods and services should be produc	ed by government?	
B) Who will get the goods and services?		
C) How will the system accommodate change		
D) How will the goods and services be produc	ced?	
53) What to produce in a market economy is ultima	tely determined by the:	53)
A) workers' technical skills.	B) output decisions of business firms.	
C) spending decisions of households.	D) government.	
54) "Consumer sovereignty" refers to the:		54)
A) fact that a federal agency exists to protect of	consumers from harmful and defective	,
products.		
B) fact that resource prices tend to be high rel	ative to product prices in capitalistic	
economies.		
C) idea that the pursuit of self-interest will pro		
D) notion that the decisions of producers and a		
kinds and amounts of goods produced mus	t be appropriate to consumer demands.	
55) The term consumer sovereignty means that:		55)
A) what is produced is ultimately determined	by what consumers buy.	
B) businesses produce with consumer satisfac	tion as their primary goal.	
C) there are no limits on what consumers may		
D) consumers are controlled by the actions of	the marketplace.	
56) The market system is said to be characterized by	y "consumer sovereignty." This is	56)
because:		
A) of the role of consumers in determining wh		
B) the prices of consumer goods are regulated	• •	
C) consumer goods are more profitable than in		
D) a large number of consumer goods are produced by the produc	duced.	
57) "The 'dollar votes' of consumers ultimately dete	rmine the composition of output and the	57)
allocation of resources in a market economy." T	This statement best describes the concept	
of:	D) dominad domests d	
A) the invisible hand.	B) derived demand.	
C) consumer sovereignty.	D) external costs and benefits.	
58) The term dollar votes means:		58)

B) consumers "vote" for certain products to be produced by how they spend their incomes.C) government is responsible for determining what will be considered legal tender.D) inflation will occur if consumers don't spend wisely.	
59) Consumer sovereignty and "dollar votes" are most related to which fundamental question	59)
about a competitive market system?	
A) How is the output to be produced?	
B) How can the system accommodate change? C) What will be produced?	
D) Who is to receive the output?	
60) Economic efficiency would be primarily discussed in response to which of the	60)
fundamental questions about a competitive market economy? A) Who is to receive the output?	
B) How will the goods and services be produced?	
C) How will the system accommodate change?	
D) What will be produced?	
61) Which fundamental question about a competitive market system primarily focuses on the	61)
cost of producing the good and services? A) What will be produced?	
B) How will the system accommodate change?	
C) Who is to receive the output?	
D) How will the goods and services be produced?	
62) The issues of distribution of goods and services and incomes in a competitive market	62)
system are the primary topic of which fundamental question?	
A) Who is to receive the output?	
B) What will be produced? C) How will the system accommodate change?	
D) How will the goods and services be produced?	
63) In the market system, the statement of "Wages, interest, rent, and profit are crucial	63)
determinants of the size of each person's income." is an indication of:	
A) What will be produced?	
B) How will the system accommodate change? C) How will the goods and services be produced?	
D) Who will get the output?	
64) For whom is a given mix of goods and services to be produced? How, in other words, is	64)
the product to be distributed among people when such commodities and services are	
available? In a market economy, this problem is resolved primarily in the:	
A) private sector through the earning and spending of income.B) business sector through the mechanism of advertising.	
C) money market through borrowing and saving by households and businesses.	
D) public sector through the mechanism of central planning.	
65) In a market economy the distribution of income would be determined primarily by	65)
A) government regulations which provide a minimum income for all.	

A) voters may be offered dollars to help elect certain political candidates.

C) consumer needs and preferences.D) a social consensus as to what distribution of income is most equitable.	
 66) Which fundamental question about a competitive market system primarily focuses on technological progress and capital accumulation? A) How will the goods and services be produced? B) What will be produced? C) How will the system accommodate change? D) Who is to receive the output? 	66)
 67) If an increase occurs in the demand for product X, we would expect all of the following to occur except: A) an increase in the output of industry X. B) an increase in the profits of industry X. C) a decrease in the prices of resources employed in industry X. D) an increase in the demand for resources employed by industry X. 	67)
 68) An increase in demand for strawberries is most likely to: A) reduce the supply of strawberry pickers. B) reduce the supply of strawberries. C) reduce the demand for strawberry pickers. D) increase the demand for strawberry pickers. 	68)
69) The market system communicates changes in supply and demand and elicits appropriate responses from businesses and resource suppliers. This is known as the: A) rationing function of prices. B) monetary function of prices. C) circular flow of income. D) guiding function of prices.	69)
 70) Which of the following best describes the "guiding function" of competitive prices? A) The market system can negotiate reallocations of resources which are appropriate to changes in consumer tastes, technology, and resource supplies. B) When prices are in equilibrium, product shortages or surpluses cannot occur. C) The market system will always generate economic profits for firms which use the least costly production technology. D) Profitable industries tend to contract and unprofitable industries tend to expand. 	70)
71) Assume the demand for product Y increases and the subsequent market system responses result in the production of more Y. This illustrates: A) the directing or guiding function of prices. B) that consumer sovereignty is inoperative in this economy. C) the scarcity function of prices. D) that the concept of derived demand is inapplicable.	71)
 72) Which statement accurately summarizes the relationship between the prices of goods and their relative scarcity? A) The price of a good is independent of the relative scarcity of the good. B) High prices lead to greater relative scarcity. C) The price of a good is a direct function of the relative scarcity of the good. D) The price of a good is an inverse function of the relative scarcity of the good. 	72)

B) the quantities and prices of the resources which households supply.

73) The most efficient combination of resources in producing any output is that combination which:		73)
A) conserves most on the use of labour.		
B) can be obtained for the smallest money ou	ıtlav.	
C) uses the smallest total quantity of all resou		
D) comes closest to using the same quantities		
entrepreneurial ability.	,, ,	
74) The development of the Internet and e-mail to 1	replace regular mail services in many	74)
cases would be an example of:		
A) creative destruction.	B) derived demand.	
C) specialization.	D) roundabout production.	
75) The development of MP3 players that significa would be an example of:	ntly reduce the market for CDs and DVDs	75)
A) roundabout production.	B) specialization.	
C) derived demand.	D) creative destruction.	
c) derived demand.	b) creative destruction.	
76) Which of the following best describes the "invi	sible hand" concent?	76)
A) The desires of resource suppliers and prod	*	70)
will automatically further the public intere		
B) Mixed capitalism is the best system for ov		
wants problem.	creoning the searce resources unmined	
C) The nonsubstitutability of resources gives	rise to a conflict between private and	
public interests and the need for government	<u>=</u>	
D) Central direction by the government will i		
capitalistic economy.	r	
J.		
77) The "invisible hand" concept suggests that:		77)
A) profit maximization is inconsistent with an	n efficient allocation of resources.	,
B) when firms maximize their profits, society's domestic output will also be		
maximized.	•	
C) government action is necessary to correct for market failures.		
D) changes in product demands are only randomly reflected in changes in the demands		
for resources.	·	
78) The "invisible hand" concept suggests that:		78)
A) market failures imply the need for a national economic plan.		,
B) big businesses are inherently more efficien	<u>-</u>	
C) given competition, private and public inter		
D) the competitiveness of a capitalistic market		
time.	, ,	
79) The "invisible hand" refers to the:		79)
A) fact that government controls the function	ing of the market system	, , ,
B) notion that, under competition, decisions r	· ·	
social interest.	nouvaled by soil interest promote the	
C) tendency of monopolistic sellers to raise p	prices above competitive levels	
D) fact that our tax system redistributes income	<u> </u>	
,	· · · · r	
80) The idea that the desires of resource suppliers a	and producers to further their own	self-intere

st will automatically further the public interest is known as:	80)		
	,	derived demand. profit maximization.	
81)	·	•	81)
82)		<u> </u>	82)
83)	The coordination problem in command economiesA) the number of industries expanded.B) planning techniques improved.C) less quantitative targets were assigned to eachD) production cost decreased.		83)
84)	As opposed to the market system, in command eco A) meeting the production targets are extremely in B) the reward for innovation is extensive. C) the reward for innovation does not exist. D) the profit motives are extremely high.		84)
85)	In the factor market: A) households sell resources to businesses. B) businesses sell services to households. C) businesses borrow money capital from households firms sell raw materials to households.	nolds.	85)
86)	 The simple circular flow model shows that: A) businesses are on the demand side of the product the factor market. B) businesses are on the supply side of both product households are on the demand side of both product market. 	luct and factor markets.	86)
87)	The two basic markets shown by the simple circula	ar flow model are:	87)

- A) product and factor.
- C) free and controlled.

- B) household and business.
- D) capital goods and consumer goods.
- 88) In the simple circular flow model:

88) _____

- A) households are demanders of factors of production.
- B) there are real flows of goods, services, and factors, but not money flows.
- C) households are suppliers of final products.
- D) businesses are suppliers of final products.
- 89) Households and businesses are:

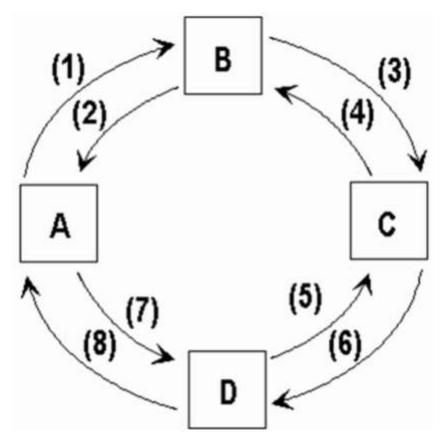

89) ___

- A) both suppliers in the product market.
- B) suppliers in the product and factor markets respectively.
- C) suppliers in the factor and product markets respectively.
- D) both buyers in the factor market.
- 90) In the circular flow model:

90) ___

91)

- A) households receive income through the factor market.
- B) households spend income in the product market.
- C) households supply factors of production to firms.
- D) all of the above hold true.

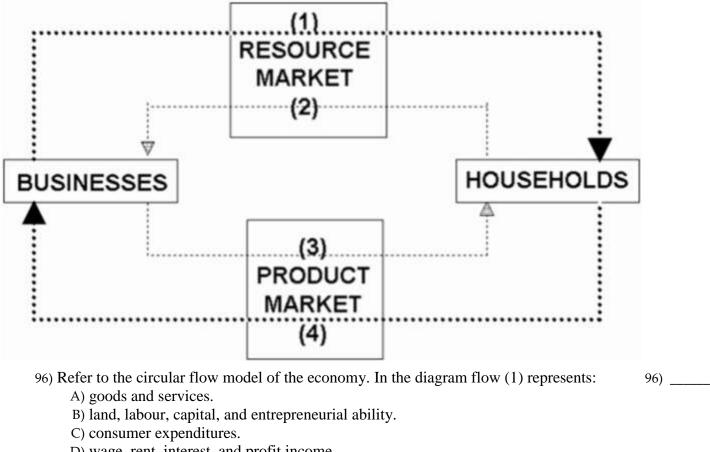

- 91) Refer to the figure. If box B represents the factor market and flow (3) represents money income, then:
 - A) box D is the product market and box C is households.
 - B) box C is the product market and box A is households.
 - C) box A is the product market and box C is households.
 - D) box C is the product market and box D is households.

92) Refer to the figure. If box A represents businesses and flow (7) represents goods and 92) ____ services, then: A) box D is the product market and box B is the factor market. B) box D is the product market and box B is households. C) box C is the product market and box B is the factor market. D) box B is the product market and box C is households. 93) In terms of the circular flow diagram businesses obtain revenue through the _____ 93) _____ market and make expenditures in the _____ market. A) product; factor B) factor; product C) product; financial D) capital; product (1) (3) BUSINESSES HOUSEHOLDS (4) (2) 94) Refer to the diagram. Arrows (1) and (2) represent: 94) _____ A) resources and goods respectively. B) output and money incomes respectively. C) goods and resources respectively. D) money incomes and output respectively.

95) _____

- 95) Refer to the diagram. Arrows (3) and (4) represent:
 - A) consumer expenditures and money income respectively.
 - B) money incomes and consumer expenditures respectively.
 - C) resources and goods respectively.
 - D) goods and services respectively.

A) goods and services.		
B) land, labour, capital, and entrepreneuris	al ability.	
C) consumer expenditures.	3	
D) wage, rent, interest, and profit income.		
97) Refer to the circular flow model of the econ	omy. In the diagram flow (2) represents:	97)
A) goods and services.		
B) wage, rent, interest, and profit income.		
C) land, labour, capital, and entrepreneuris	al ability.	
D) consumer expenditures.	•	
· · · · · · · · · · · · · · · · · · ·		
98) Refer to the circular flow model of the econ	omy. In the diagram flow (3) represents:	98)
A) goods and services.	-	
B) consumer expenditures.		
C) wage, rent, interest, and profit income.		
D) land, labour, capital, and entrepreneuris	al ability.	
-	•	
99) Refer to the circular flow model of the econ	omy. In the diagram flow (4) represents:	99)
A) wage, rent, interest, and profit income.		
B) goods and services.		
C) consumer expenditures.		
D) land, labour, capital, and entrepreneuris	al ability.	
100) In terms of the circular flow diagram housel	nolds make expenditures in the	100)
market and receive income through the	market.	
A) capital; product	B) product; factor	
C) factor: product	D) product: financial	

indi vidual

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

101) Specialization may be conducive to an expansion of total output even though the

s involved may have identical abilities.	101)	_
102)	A division of labour enhances society's output by permitting people to take advantage of existing differences in their abilities and skills.	102)
103)	Money functions as a medium of exchange in permitting the ready comparison of the relative worth of heterogeneous products.	103)
104)	Government alters the distribution of income by market intervention, in which case it modifies the prices established by market forces.	104)
105)	Property rights do not encourage people to cooperate.	105)
106)	Consumer sovereignty means that legislation now protects the rights of consumers to dispose of their incomes as they see fit.	106)
107)	The wants of consumers are expressed on the demand side of the product market.	107)
108)	The guiding function of prices indicates that, at equilibrium prices, neither product surpluses nor shortages can occur.	108)
109)	The "invisible hand" refers to the many indirect controls which the federal government imposes in a system of mixed capitalism.	109)
110)	In a competitive market economy, firms and resource suppliers will seek to further their own self-interest, but at the same time, as if guided by an "invisible hand," they will promote the public interest.	110)
111)	In the simple circular flow model businesses are suppliers of final products.	111)
112)	Households and businesses are both suppliers in the product market.	112)
